SPA ESSENTIALS

No sweat!

Sweax Underarm Liners for men and women are made from an absorbent material with a self-adhesive backing, similar to a panty liner. They absorb liquid while protecting your clothing. The adhesive used in the liners is safe for use on most fabrics, including silk, and is completely invisible on all non-sheer fabrics. The ultra thin liners are soft and comfortable and are ideal for long days in the treatment room, so you won't be greeting clients with sweaty armpits.
